Core Skills

Python, Typescript, JavaScript, Java, C#, Django, FastAPI, MLOps, Kubernetes, Docker, Jenkins, Splunk, AWS, GCP, Linux, Windows,

Experience

Auto Owners Insurance 2022 – Present

Senior Data Science Platform Developer

- Architected and developed the first large scale AWS project at the company.
- Built and maintained containerized Python ML services deployed to Kubernetes clusters.
- Reduced security vulnerabilities by 20% through infrastructure hardening.
- Designed a Kubernetes application template that reduced deployment time by multiple days.
- Partners with developers and security teams to create and implement cloud best practices.
- Lead division wide workshop series on developer best practices, security, and maintainability.
- Designs complex systems for team development. Clarified details, communicated with stakeholders, and developed along with the project team.
- Added testing to several legacy applications, increasing coverage by 40%.

Fannie Mae 2021

Technology Management Intern

- Researched internal vulnerabilities by testing AWS services, monitoring logs, and analyzing data.
- Viewed and assessed NIST requirements for multiple applications.

Education

Eastern Michigan University 2022

B.S., Computer Science — summa cum laude

Personal Projects

Task Aggregator TypeScript, Vite

A web app designed to securely track work time.

Muninn Django, Apache, AWS, MySQL

Created a habit tracker website as part of a six person team. Switched between frontend and backend developer roles.
